THE PALISADES PORTFOLIO

LEVERAGE TO A JUNIOR BULL MARKET

Over the past five years, Palisades has developed a playbook that has allowed the Company to generate significant returns for shareholders. In order to accomplish this, management has assembled a portfolio of projects and investments that it believes have the ability to offer asymmetric return opportunities.

THE PALISADES PLAYBOOK

Palisades uses its industry knowledge to identify opportunities that have significant upside potential and then structure vehicles or investments to create opportunities for shareholders.

In 2015, Palisades established New Found Gold Corp. and Nevada King Gold Corp., later floating them to market in 2020 and 2021.

Palisades founded Radio Fuels Resources and Made in America Gold Corp. to take advantage of opportunities in the uranium and gold markets. Palisades currently owns 100% of both companies, opening up the opportunity for significant future monetization events.

In other cases, Palisades takes minority stakes in companies that offer significant upside returns, backing teams focused on exploring for and developing the mines of tomorrow.

\$56-MILLION RETURNED TO SHAREHOLDERS

Since 2021, Palisades has returned \$56-million to shareholders through seven return-of-capital distributions, a tax efficient method of providing returns.

Return of Capital Distributions

Palisades currently has approximately \$30-million of paid-up-capital that it can use to structure additional return-of-capital events.

A HIGH QUALITY PORTFOLIO

In addition to its ownership in New Found Gold, Palisades has established positions in companies that offer significant upside potential.

These positions are established through both open-market purchases, as well as through structured financings.

The Palisades team is constantly on the lookout for an opportunity to generate the next New Found-type of returns for its shareholders.

STRUCTURING FINANCINGS AND PRIVATE PLACEMENTS

Palisades investors benefit from the Company's strong balance sheet and position as an active financier. The Palisades team actively negotiates favorable financing terms that may include full, long-duration warrants. Junior company risk is mitigated by the portfolio's diversification and by discounted entry points that can only be achieved through participating in private placements.

The Palisades team sees over 100 deals per month and uses specific decision criteria to identify opportunities and make investments. Palisades is flexible in its investment size, with investments ranging between \$50,000 and \$3,000,000. This strategy provides Palisades shareholders with broad sector exposure highly leveraged by the power of the almighty warrant.

PRIVATE PLACEMENTS AND THE POWER OF THE ALMIGHTY WARRANT

Most junior financings are made available to a select group of accredited investors to the exclusion of the majority of market participants. Palisades provides investors with an avenue to own a diversified, warrant-leveraged portfolio of private placement investments.

By participating in private placements, Palisades' investors benefit from attractive entry points as well as the upside afforded through warrants.

Warrants offer investors the option, but not the obligation, to purchase additional shares at a later date at a fixed price.

Example: ABC Gold is trading at \$.06 per share. Palisades partakes in a private placement with a discounted entry point at \$0.05 per unit, with each unit including a share and a three year warrant that strikes at \$0.10 per share. If at anytime during the next three years, the price of ABC Gold rises above \$0.10 per share, Palisades may, at its sole discretion, purchase more shares at \$0.10 and sell as soon as the same day, locking in additional profit.

Palisades is an active participant in both the Canadian and Australian junior markets, which together represent over 90% of listed junior resource companies.

100% OWNERSHIP

(PRIVATE)

Palisades owns 100% of the Eco Ridge Uranium/Rare Earth Project, located in the historic production town of Elliot Lake, Ontario. This large resource provides incredible leverage to upside moves in both uranium and rare earths.

NEW FOUND GOLD CORP.

New Found is a \$600-million company, advancing its 100%-owned Queensway Project through exploration and development.

The Queensway Project is a high-grade gold discovery accessible via the Trans-Canada Highway, with power on site, 15km west of Gander, Newfoundland.

Palisades founded New Found in 2016, providing the seed capital and carrying the company through discovery and IPO. As a significant shareholder, Palisades continues to play a key role in the company's growth, facilitating the recruitment of a world-class management team to advance the project. **Palisades' overall investment in New Found amounts to \$9,400,000 - a position now worth in excess of \$115-million.**

PROTECTING OUR CASH WITH PHYSICAL BULLION

Any excess cash held by Palisades that is not currently invested is held in physical precious metals. Bullion is held in a secure vault in Singapore and is fully allocated. Palisades management opts to use a mix of gold, silver, and platinum dependent on relative price performance.

Palisades holds approximately \$600,000 of bullion.

All of Palisades bullion is safely stored at the Reserve, which is owned and operated by director Gregor Gregersen. The Reserve is the largest above-ground silver vault in the world.
